

## Instructions for IT Staff to Load VMC Desktop Version on User’s Computers

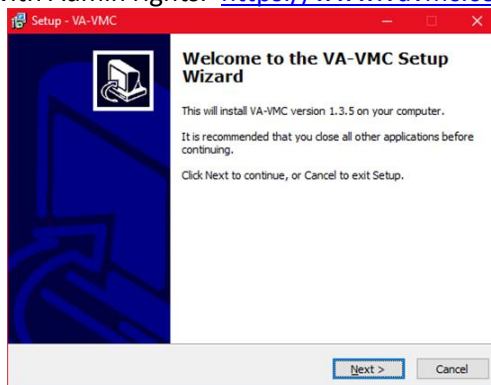

1. Make sure the computer you are installing the VMC on meets the following download specs:

Operating System	
Minimum Version	Windows 8.1
Recommended Version	Windows 10
Minimum Hardware	
System RAM	4GB
Video RAM	512MB
Graphics	Any 3D graphics card that supports Shader Model 2.0 or greater
Storage	700MB available for installation
Recommended Hardware	
System RAM	8GB or greater
Video RAM	1GB or greater
Graphics	Discrete (dedicated) graphics card that supports Shader Model 3.0 or greater
Storage	700MB available for installation

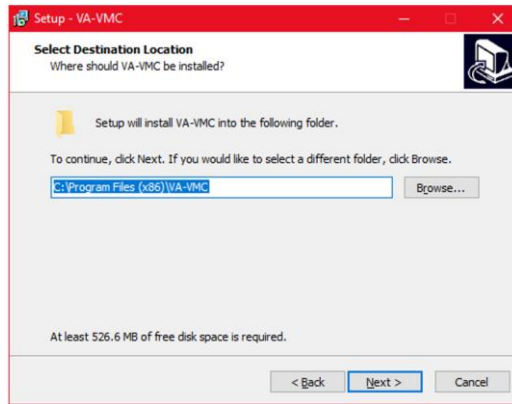

2. Using Google Chrome or Microsoft Edge (**not** IE), go to <https://www.vavmc.com> and click on **Download Desktop Version > WINDOWS**.

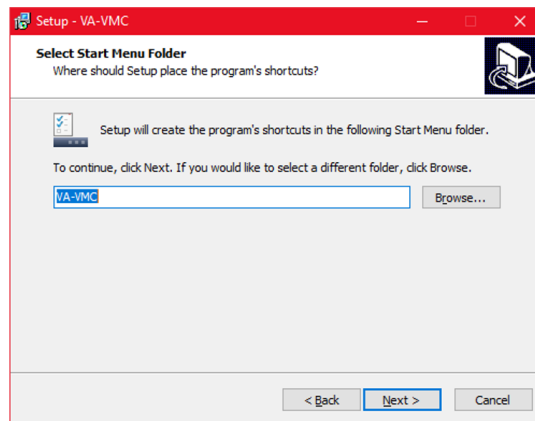

3. Download the “Setup.exe” (use any other browser except IE).
4. Launch the Setup.exe with Admin rights. <https://www.vavmc.com/installers/vavmcsetup.exe>

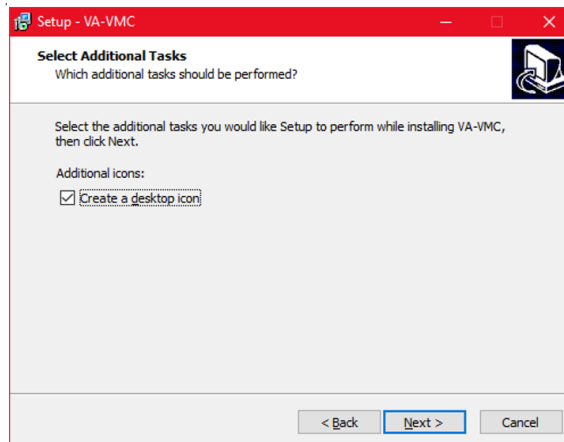

5. Select Next:

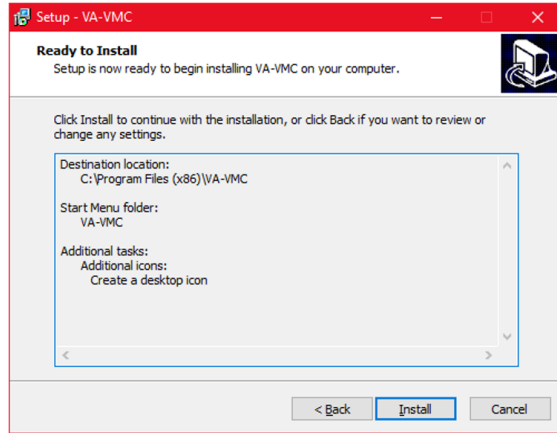

6. Select Next:

7. Check the "Create a Desktop icon" box (this will create a shortcut on Public Desktop for everyone can see when they log on into the machine). Select Next:

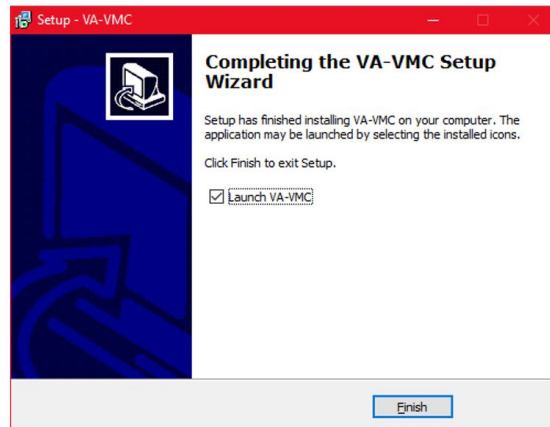

8. Click Install:

9. Let the install process go through.

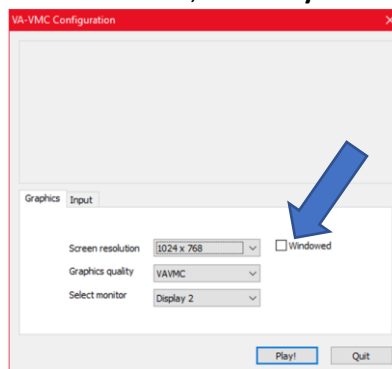

10. Once the installation process is complete, click **Finish** to launch the application:

11. Double-check the icon on the Desktop to launch the VA-VMC:

12. Recommend checking the “Windowed” box; click **Play!** to run the application:

13. The application will launch the log in screen (remember your username is your VA email address):
